

ANDRES ALFONSO MIRA MEJIA

PROFESSIONAL EXPERIENCE

IAS Software – Software Developer

Date: July 2023 – February 2026

- ⚡ 60% chatbot performance boost | Optimized backend architecture and component reuse in NestJS.
- 🕒 30% faster development | Standardized modules using Hexagonal/Onion patterns and SOLID principles.
- 🔒 -20% technical debt | Applied SOLID principles and design patterns in systematic refactoring.
- 🔧 Technical Contributions: Backend & Cloud Architecture, AI/Conversational Systems, Frontend Engineering, DevOps Excellence, Security Leadership.

IAS Software – BI Developer / Data Engineer

Date: December 2022 – June 2023

- 📊 50% faster report generation | Automated ETL transformations and reused Power BI visualizations.
- ⚡ 40% improvement in dashboard refresh times | Optimized data flows with partitioning and incremental load strategies.
- 🔧 Technical Contributions: Data Modeling & Architecture, ETL & Data Integration, Business Intelligence & Visualization, Performance Optimization.

Grupo Avalon – Programmer Analyst

Date: June 2022 – November 2022

- 📊 60% increase in data availability | Implemented robust data collection and transformation frameworks.
- 🕒 50% reduction in manual tasks | Automated processes via Python scripts and custom ETL pipelines.
- 🔧 Technical Contributions: Automation Engineering, Advanced Business Intelligence, Process Optimization.

Emtelco CX & BPO – BI Engineer

Date: March 2021 – June 2022

- ⚡ 50% faster report delivery | Automated ETL pipelines and Power BI dashboard generation.
- 💛 40% team efficiency gain | Implemented Git Flow and BI process standardization.
- 🔧 Technical Contributions: ETL & Data Warehousing, Business Intelligence, BI DevOps, Technical Leadership.

PROFESSIONAL SUMMARY

I architect high-performance systems that bridge business needs with cutting-edge tech:

- Backend: Scalable APIs with Java/Spring Boot & NestJS (Clean Architecture, Microservices)
- Frontend: Dynamic UIs with Angular (State Management, RxJS)
- Data/AI: ETL pipelines, Power BI analytics & conversational AI (NLP/LLM integration)

My technical superpowers:

- ⚡ 60% faster systems through architecture optimization and code refactoring
- 🔧 -30% tech debt via SOLID principles, automated testing (PyTest/Karate)
- 📊 Data-to-decisions: Built financial dashboards cutting report generation by 50%

I thrive in cross-functional teams, solving complex problems with:

- ✓ Cloud-native development (AWS/Azure)
- ✓ CI/CD automation (Azure DevOps)
- ✓ ML-powered chatbots (NLP intent recognition)

Let's connect if you're passionate about clean code, data-driven solutions, or AI innovation!

WORK EXPERIENCE SECTORS

- Financial
- Sales
- Transportation
- Telecommunications
- Technology
- Tourism
- Insurances

LENGUAJES

- Spanish -> Native
- English -> Intermediate (B1-B2 CEFR)

SOCIAL MEDIA

Ultracom IT – BI Engineer

Date: December 2019 – March 2021

- ⚡ 70% faster OLAP queries | Redesigned SSAS cube architecture & centralized 50+ strategic metrics.
- 🕒 30% faster development using reusable ETL templates.
- 🔧 Technical Contributions: Data Architecture, ETL & Automation, Business Intelligence.

Emtelco CX & BPO – Programming and Control Analyst

Date: December/2012 – November/2019

- ✅ +40% reporting efficiency
 - Automated 15+ payroll/operations reports (Power BI + Excel VBA), reducing generation time from 8h → 30min.
 - Unified dashboards with early-warning alerts for KPI non-compliance.
- ✅ +95% planning accuracy
 - Shift schedule modeling based on historical data and forecasting, optimizing resource allocation.
 - Achieved 20% cost reduction by eliminating over/understaffing.
- ✅ +30% billing speed
 - Implemented automated service data consolidation (SQL + Power Query).
 - Eliminated manual errors in financial reporting.
- 🔧 Technical Contributions: Automation, Built Power BI dashboards with DAX, Data Modeling, Process Optimization, Management.

TECHNICAL SKILLS

Languages: Java (Spring Boot), Python (ETL, NLP), TypeScript.
Cloud & DevOps: AWS (Lambda, S3, DynamoDB), Azure DevOps, CI/CD, Docker.
Data/BI: Power BI, SSIS, SSAS, ETL, OLAP, Data Modeling.
Frontend: Angular, UX/UI Optimization.
Testing: PyTest, Karate, JMeter.
Patterns: Hexagonal, Onion, MVC, Event-Driven Architecture.

EDUCATION

Business Intelligence Specialist – Catholic of the North (2019)
Bachelor's Degree in Computer Engineering – Catholic of the North (2018)
